	Data is being synchronized.		Battery mark
	SD card space is insufficient.		Battery is being charged.
	WIFI service is connected and network is available.		Flying mode
	GPS positioning		Bluetooth is connected.
	3G service is being connected and data is being exchanged.		SIM card information, roam, and no signal
	Dial/receive		Reject the call

1.4 Key Functions

Descriptions on Key functions:

Power Source key	● Long press this key to start ● In start status, long press this key to pop out the power off option ● In start status, press this key to close the screen. ● In start status or when failure occurs to the machine, long press the Power Source key for 7 seconds to let your device into power off status
Volume	● Press Volume+ to turn up the volume, Volume- to turn down the volume

1.5 Start screen in close status

If the screen is in close status, you can short press the power source key or long press the return key to start the screen. After the start, the screen enters lock status, use your finger to press and hold “Lock” icon and slide toward right to unlock the screen.

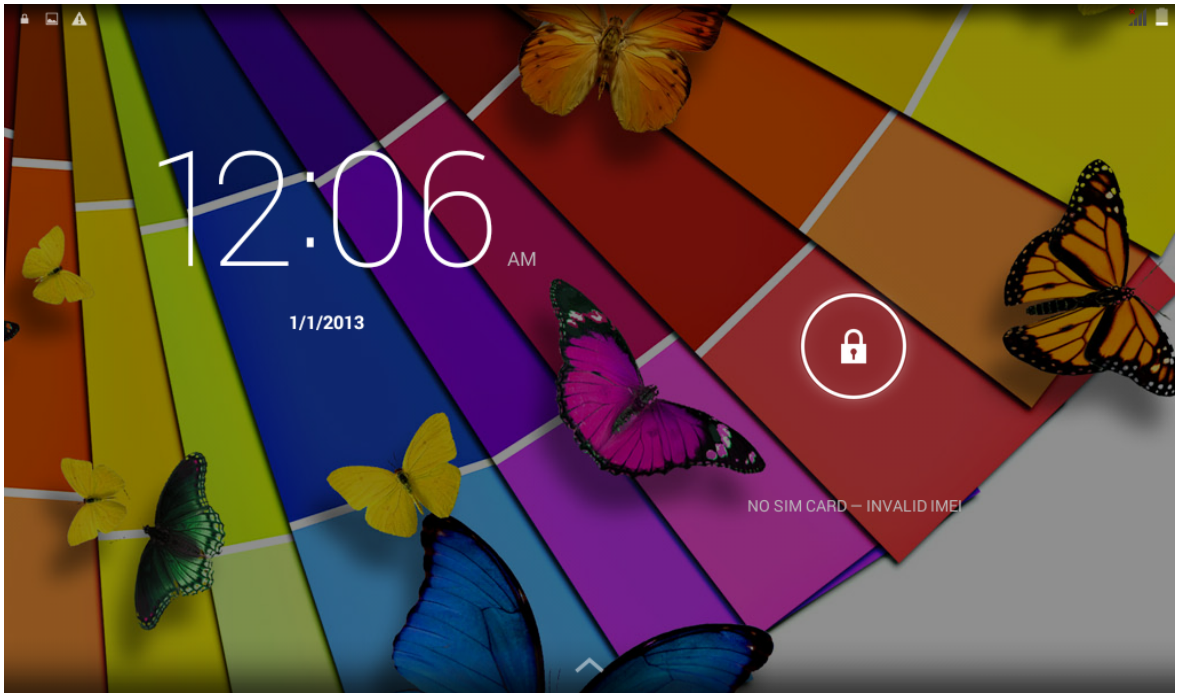

Figure 1-5

1.6 Use of Touch Screen

Operation modes in the Tablet PC

There are multiple methods to view the home screen, menu and application programs on your Tablet PC.

Choose by pointing

When you want to use screen keyboard to input information and choose items on the homepage interface such as application programs, you only need to point with your finger.

Press and hold

If you want to start the available option of a certain item (such as text box or link in the webpage), or move the shortcut and the main program menu on the homepage interface, you only need to press and hold this item.

Quick slide or slide

Quick slide or slide means using finger to make quick vertical or horizontal drag action in the picture.

Drag

Before beginning to drag, you must use your finger to press, hold, and apply certain pressure and do not loosen your finger before you drag the item to the position you desire.

Rotation

Regarding most pictures, you only need to rotate the Tablet PC sidewise, and the screen can be automatically turned from horizontal to vertical direction, such as the cases when you input words and see a movie.

1.7 Homepage Interface

The main menu screen will display all the application programs on the native computer. You can use the application programs, shortcut and customize the wallpaper of your homepage interface.

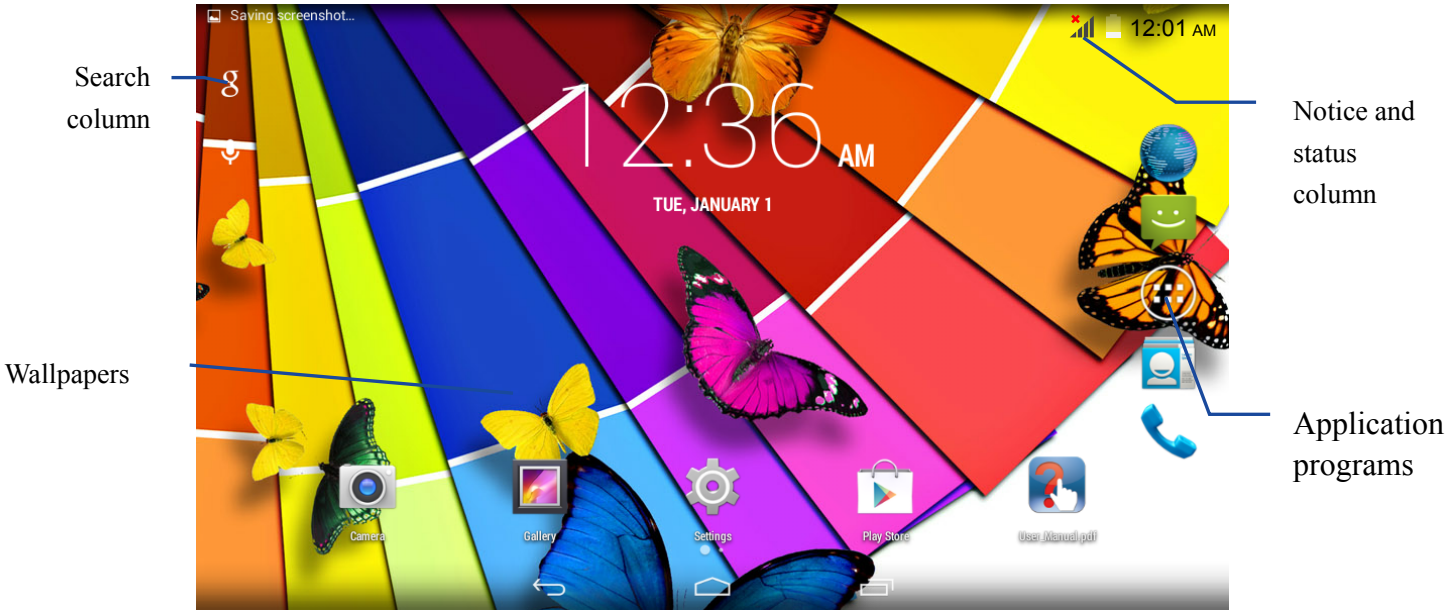

Figure 1-6

Skill: In any application programs, it is possible to press the Homepage key to return to the homepage interface.

1.8 Conversation Function

Dial phone calls

You can dial a phone call through the dial application, or choose a number from contact person application for dialing. When you are in a conversation, you can click the key to use other functions. If you want to return to the phone call interface, slide the status column downward and click the current conversation.

※When dialing or receiving a phone call, do not contact or touch the receiver and the loudspeaker to avoid influencing the conversation quality.

Dial a phone call through dialing application.

1. On the main screen, click and choose the application program, and dial to open the phone call application.
2. Click the digit key to input the phone call number.
3. Click the dial icon to dial a number.

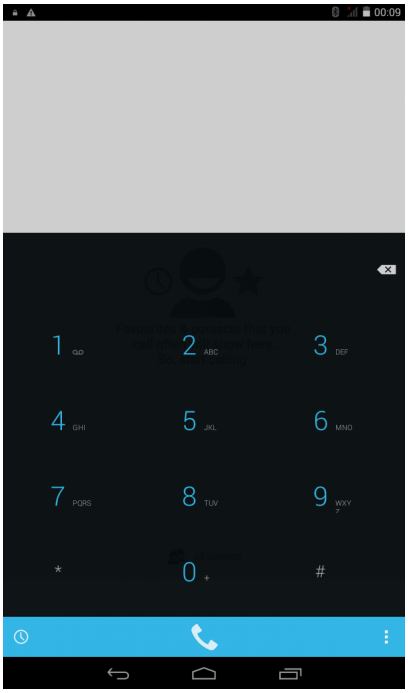

Figure 1-7

Dial a phone call through contact person.

1. On the main screen, click and choose the application program, and the dial to open the phone call application.
2. Click the contact person icon to the contact person tab, and click a contact person to dial a phone call.

Dial a phone call through conversation record

1. On the main screen, click and choose the application program, dial to open the phone call application, and switch to the conversation record tab.
2. Click the key on the right side of the conversation record to dial this number.

Receive or Reject a phone call

Receive a phone call

When there is an incoming phone call, drag the phone call icon toward the right to receive a phone call.

End a conversation.

In a conversation, click the Hook-on icon to end the conversation.

Reject an incoming call.

When there is an incoming phone call, drag the phone call icon toward the left to reject the phone call.

※ You can also drag it upward to the short message icon, reject the phone call and send a shor message to the caller.

1.9 Access Application Programs

How to access the application programs of the Tablet PC:

1. Click the application program menu, as shown in Figure 1-8
2. Choose the application program to be accessed.
3. When wanting to exit from the program interface, press Return key to return to the preceding interface or press Homepage key to directly return to the homepage interface.

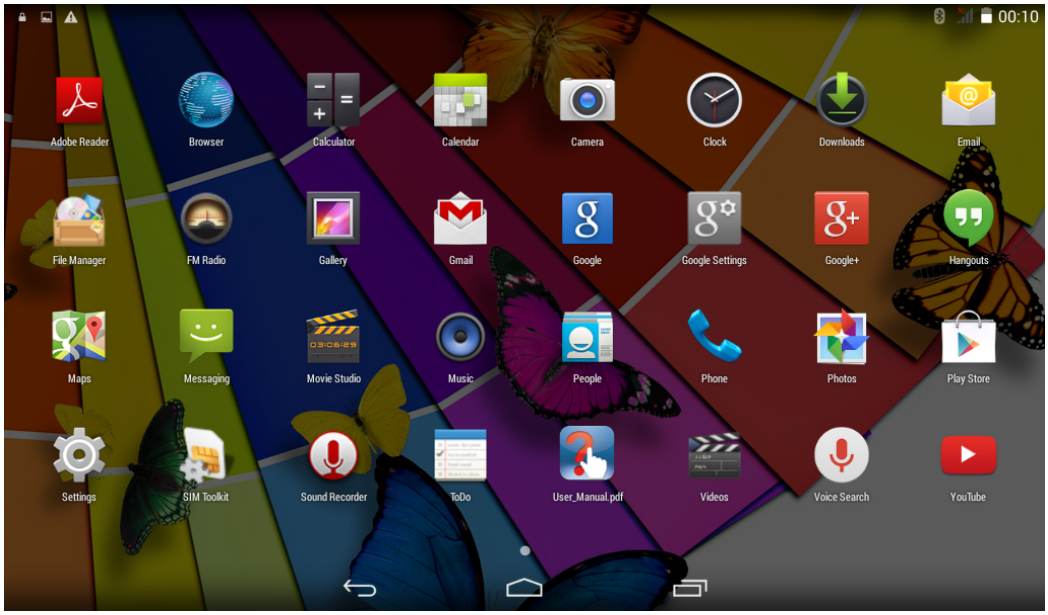

Figure 1-8

1.10 USB Connection

Tablet PC Storage Setting

Before transmitting the file, you must firstly set up storage mode for your Tablet PC:

1. Use USB transmission line to connect the Tablet PC and the computer. A notice prompt will appear in the notice column.
2. Click status column, and status column option appears.
3. In the status option, click and choose **USB connected**, and then click and choose **Open USB Storage Device**.
